

*Clean working with reusable and tear proof
oil absorbing mat, filled with oil sorbents!*

Data Sheet: Oil mat / work mat with protective foil

Usage:

Safely absorb oil, paint, fat or e.g. battery acids (up to 38%). Use mat as a **precautionary measure** against possible leakages.

- **alternative instead of oil collection vessels**
- clean storage for all kind of greasy stuff
- oily tools, engine parts, chainsaws...
- for inside and outside applications
- repair shops, garages, boats
- hazardous material transportation (according to ADR/WHG regulations)
- hydraulic connections
- oldtimers, accident cars
- repair and dismantling work

Picture: Lower side, protective foil

Multi-layered:

Textile – Sorbent - Textile - Protective Foil

Size L* B (m):

Big: 0.8*1.2 **Middle:** 0.8*0.6 **Standard:** 0.4*0.6

round mat for barrels, **rolls** max. 25m length and 5 m width or individual design

Attributes:

Water repellent, low wind sensitivity

Weight:

3.6 kg per sq m, thickness: 1 cm

Absorbing force:

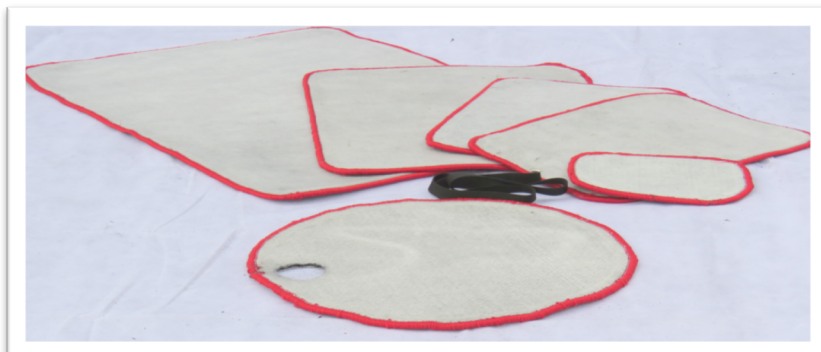

1 sq m absorbs up to 8 l oil

Technology:

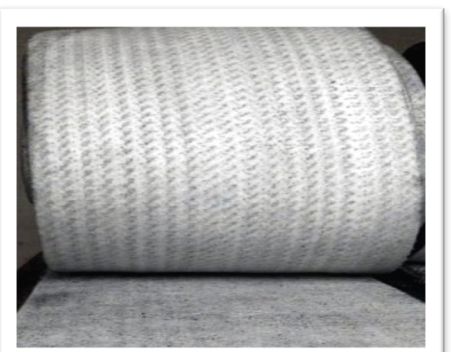

Due to "Van-der-Waals-Forces" the oil molecules are bound fast and strong onto the binder granulate material like iron from a magnet. This power is strong enough to hold all contamination even when mats are lifted out of the water.

Certificate:

Approved for usage in public sectors "Type I, II SF, Nr. 22 000 9704 13
